Summary

Full Stack Developer with 3+ year of experience building modern, responsive, and scalable web applications using PHP, Laravel, Python, Django, JavaScript, TypeScript, React.js, Next.js, and Node.js. Proficient in developing robust backend systems, RESTful APIs, database-driven applications, and reusable frontend components. Experienced with MySQL, MongoDB, Tailwind CSS, API integration, authentication, and CRUD operations. Skilled in writing clean, maintainable, and efficient code while following industry best practices. Strong understanding of responsive web design, Git, GitHub, Agile development workflows, and full-stack application architecture. Passionate about learning new technologies, AI-assisted development, and building high-performance digital solutions.

Skills

Frontend

HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Angular, Vue.js, Tailwind CSS, Bootstrap, Material UI, Redux Toolkit, Context API, Axios, React Router, Responsive Web Design, REST APIs

AI Development

GitHub Copilot, ChatGPT, Claude AI, Gemini, Cursor AI

Version Control

Git, GitHub, GitLab, Branching Strategy, Pull Requests (PRs), Merge Conflict Resolution, Code Reviews, Version Control Workflows, Collaborative Development.

Database

MySQL, MongoDB, Database Design, Schema Modeling, CRUD Operations, Query Optimization, Indexing, Data Modeling, Database Normalization, Transactions, Data Migration, Backup & Recovery (Basic).

Backend

Node.js, Express.js, Python, Django, REST APIs, JWT Authentication, OAuth, MVC Architecture, WebSockets, Multer, Passport.js, Socket.IO, API Integration, PHP

CMS

Wordpress,, Shopify, Joomla

Experience

Full Stack Developer, *Softerio Solutions*

02/2023 – Present
Lahore

- Developed and maintained responsive, scalable web applications using PHP, Laravel, Python, Django, JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, and Tailwind CSS, ensuring seamless experiences across desktop, tablet, and mobile devices.
- Built and integrated RESTful APIs, backend services, authentication systems, CRUD functionality, and database-driven features using Laravel, Django, Node.js, MySQL, and MongoDB.
- Transformed UI/UX designs into pixel-perfect, accessible, and cross-browser compatible interfaces while integrating frontend components with backend APIs to deliver complete end-to-end web solutions.
- Developed reusable frontend components and modular backend architecture to improve code maintainability, scalability, performance, and development efficiency across multiple projects.

- Optimized application performance through efficient database queries, API optimization, code refactoring, lazy loading, and frontend/backend performance improvements to enhance speed and reliability.
- Collaborated with designers, backend developers, and cross-functional teams using Git and GitHub, actively participating in code reviews, debugging, testing, API integration, and Agile development workflows to ensure high-quality project delivery.

Projects

Hassan Farooqi

04/2026 – 06/2026

- Developed and deployed a high-performance portfolio website for Hassan Farooqi to establish a strong personal brand and professionally showcase expertise, projects, and digital services.
- Built a responsive and interactive frontend using React.js, delivering fast page rendering, smooth navigation, and an engaging user experience across desktop, tablet, and mobile devices.
- Developed a secure backend using Node.js and Express.js with MongoDB integration to efficiently manage dynamic content, project information, and contact form submissions.
- Implemented reusable and maintainable component-based architecture, improving scalability, simplifying future enhancements, and promoting clean development practices.
- Applied mobile-first design principles to create visually appealing, accessible, and cross-browser compatible interfaces that maintain consistency across different screen sizes.
- Optimized overall website performance through efficient data handling, code optimization, and frontend best practices to ensure speed, reliability, and seamless user interactions.

Technologies: React.js, Node.js, Express.js, MongoDB, CSS3

Shawarma Stop

03/2026 – 04/2026

- Developed and deployed Shawarma Stop, a modern and high-performance restaurant website designed to enhance the digital presence of the business and provide customers with an engaging browsing experience.
- Built the frontend using Next.js and TypeScript, leveraging server-side rendering (SSR) and framework optimizations to deliver fast page loads, improved SEO, and smooth navigation.
- Implemented strict type-safety with TypeScript to improve code quality, reduce runtime errors, and support scalable and maintainable development practices.
- Designed and developed reusable, component-based user interfaces using Tailwind CSS, ensuring consistency, maintainability, and efficient feature development.
- Created a fully responsive, mobile-first user experience with intuitive navigation, allowing customers to seamlessly explore menu offerings and restaurant information across all devices.
- Optimized overall website performance through clean code practices, image optimization, cross-browser compatibility testing, and frontend best practices to deliver a fast, reliable, and user-friendly experience.

Technologies: Next.js, TypeScript, Tailwind CSS, JavaScript

Exact flow

02/2025 – 01/2026

- Developed and contributed to the Exact Flow website, delivering a modern, high-performance digital experience with a strong emphasis on speed, usability, and responsive design.
- Built the frontend using Next.js and TypeScript, leveraging server-side rendering (SSR) and framework optimization features to improve performance, SEO, and page load efficiency.
- Implemented strict type-safety with TypeScript to enhance code reliability, reduce runtime errors, and support scalable development practices for complex data handling.
- Designed and developed reusable, component-based user interfaces using Tailwind CSS, promoting consistency, maintainability, and efficient development workflows.
- Created a fully responsive, mobile-first experience that ensured seamless functionality and visually consistent layouts across desktop, tablet, and mobile devices.
- Optimized the website through performance-focused techniques, clean code practices, and cross-browser testing to deliver smooth interactions, improved accessibility, and an exceptional user experience.

Technologies: Next.js, TypeScript, Tailwind CSS, JavaScript

Education

BS, CS, *virtual university*

06/2026 – Present
